

Section 3-208 (150).

In Subsection 414.13 of the Fourth Edition of the BOCA Basic Building Code, immediately following the word "garages," strike the words "exceeding seven hundred and fifty (750) square feet in area and".

Section 3-208 (151).

In Subsection 618.41 of the Fourth Edition of the BOCA Basic Building Code, immediately below the last line of the standards for maximum riser and minimum tread, add the following sentence: "All stairways shall have uniform risers and uniform treads."

Section 3-208 (152).

Immediately following Subsection 835.4 of the Fourth Edition of the BOCA Basic Building Code, add the following new Subsection: "Subsection 835.5. Top Course Capping. Walls of hollow masonry shall be capped with at least four (4) inches of solid masonry or concrete or shall have the cells of top course filled with concrete or grout at least four (4) inches thick."

Section 3-208 (153).

Immediately following the last sentence of Subsection 837.0 of the Fourth Edition of the BOCA Basic Building Code, add the following sentence: "The ratio of unsupported height or length of wall to thickness of solid masonry walls shall be not more than twenty (20) times, for hollow masonry units shall not be more than eighteen (18) times, for cavity masonry units (use net thickness) shall not be more than eighteen (18) times, and for reinforced masonry units shall not be more than twenty (20) times. The ratio of the unsupported height of piers to the least dimension for solid masonry shall not be more than ten (10) times, and for hollow masonry shall not be more than four (4) times."

Section 3-208 (154).

Immediately following the period after the word "wood" on line 3 of Subsection 876.3 of the Fourth Edition of the BOCA Basic Building Code, add the following sentence: "Sills which are more than six (6) inches from exposed earth may be approved or treated wood, or shall be protected against termites by means of a protective shield between the foundation or apron wall and all wood members. Shields are required to be continuous and unpierced and may be of aluminum, copper, galvanized steel of not less than No. 26 U. S. gauge, or other corrosive resistive materials. They are to extend not less than two (2) inches beyond the face of the wall and to be bent downward at an angle of forty-five (45) degrees to form a protective hood."

Section 3-208 (155).

In Subsection 907.8 of the 1968 Accumulative Supplement to the BOCA Basic Building Code, strike the words "at the lower surface of the roof sheathing" immediately following the word "stopped" on line 5, and insert in lieu thereof the following: "six (6) inches above the top of the roof framing."

Section 3-208 (156).

In Subsection 1309.1 of the Fourth Edition of the BOCA Basic Building Code, add the following sentence immediately following the period after the word "property" on the last line of said section: "Grade around build-
